

Intruder Verifiable Security Alarm System

The Cybereye is a home security alarm that detects an intruder and a fire. It calls pre-stored phone numbers (Mobile Phone and Telephone) and sends a recorded voice message when the system detects an intruder or a fire. In addition, you can monitor sounds and scare the intruder away with the speakerphone function.

Model : CF-200F

Major Features

- Calls up to 5 designated telephone numbers
 - 24-hour intrusion and fire monitoring without monthly fees
 - Verification by sound monitoring & voice warning from remote locations
 - Adjustable entry and exit time delay
 - Based on emergency situations, pertinent voice message is played (Intrusion, fire, Gas, Emergency, Power failure)
 - Low battery indication with LCD & voice message for replacement
 - Compatible use with all communication lines (Tone, Pulse, ADSL, and ISDN)
 - Emergency call can be made even if the phone or fax line is busy
 - Selectable arming, either total or perimeter
 - Perimeter arming is a useful function for those who keep pets at home to prevent any undesired operation
 - After confirmation, the system can be disabled to stop the calling cycle
 - A microprocessor to prevent any undesired operation which may be caused by an external radio wave installed
 - Test mode for easy installation
- (Operation test between Cybereye and optional sensors)

Wireless options

Wireless Door Sensor (DS-200F), Wireless Motion Sensor (BS-200F), Wireless smoke sensor (SS-200F/300F), Wireless Gas Sensor (GS-200F), Wireless Siren (SR-200F), Wired Siren (SR-200C), Wireless Emergency Switch (ES-200F), Wireless Window Sensor (WD-200F), Wrist/Pendant Transmitter (WS-200F/PR-200F), Radio Wave Relay Transmitter (FF-200F), Wireless Emergency Lamp (LP-200F/300F), Wireless Outdoor Sensor (OS-200F)
